City of San Diego Water Main Replacement

North Clairemont | Project 554 (Water Group 901 & 902CI)

South Clairemont | Project 555 (Water Group 903 & 904CI)

Construction Update Newsletter **FINAL UPDATE** Winter 2009-10

Celebrating Completion!

A The City of San Diego completed the North Clairemont Project 554 (Water Group 901 & 902CI) and South Clairemont Project 555 (Water Group 903 & 904CI) six months earlier than planned. All new durable PVC (polyvinyl chloride) pipe now replaces seven miles of deteriorating pipes and reduces risks of future water main breaks and associated service interruptions.

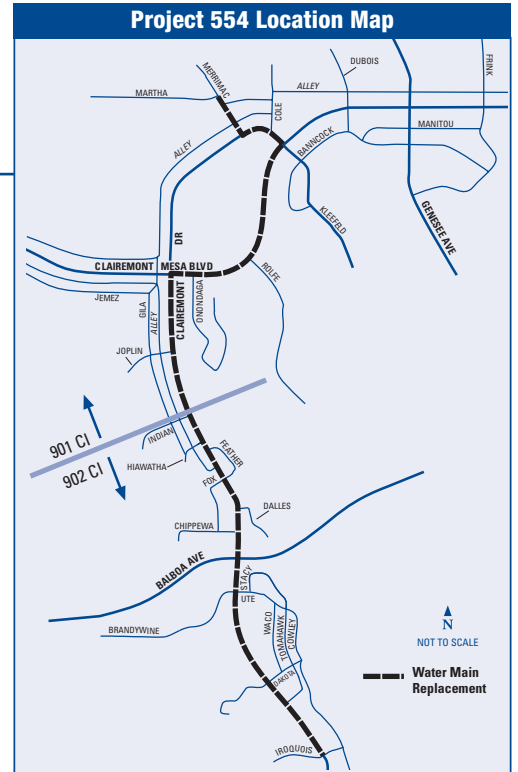

Crews quickly trenched along Clairemont Drive near Clairemont Village Shopping Center to minimize traffic delays associated with Project 555.

Construction crews will return briefly in spring 2010 when warmer weather arrives to repave the following streets:

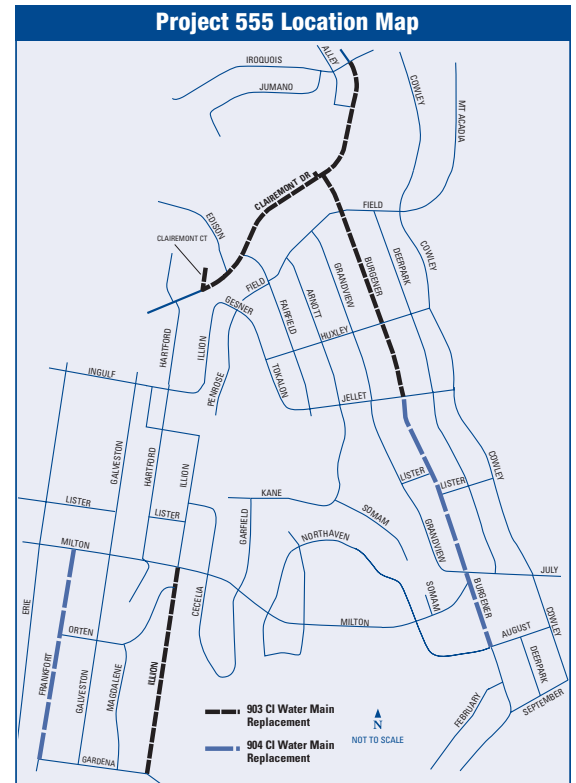

- Clairemont Drive from Iroquois Street to Clairemont Court
- Burgener Drive from Clairemont Drive to August Street
- Both Illion and Frankfort Streets between Milton and Gardena Streets

The project team thanks the Clairemont community for its patience and flexibility during construction. This job couldn't have progressed without the cooperation from residents who promptly moved parked vehicles when notified, tolerated equipment noise and adjusted to the temporary driving detours.

continued on page 2

Both 901CI and 902CI projects finished ahead of schedule.

Water now flows through the new 903CI and 904CI pipelines. All major construction work ended six months earlier than anticipated.

If you have any questions about this project, please call our public information line at (619) 533-4207. To view larger maps, please visit us online at www.sandiego.gov/engineering-cip.

City of San Diego Drought Watch

While the new pipelines are installed to provide safe, efficient and reliable water, it is important to remember that San Diego is currently in a drought. There is an urgent need to conserve water since less water is available to residents and businesses. For more information, visit www.sandiego.gov/water/conservation/drought/index.shtml.
