

EYE ON CLAIREMONT

Smile.... you never know if we have our EYE on you!

Submit your Clairemont snapshots to: editor@clairemontcommunitynews.com

Clairemont fans of heavy equipment have to be in heaven these days as the water main replacement project moves along Clairemont Drive. Cast iron water mains installed as early as 1950 are being replaced with new plastic ones so EYE's seen huge machines of every description

roaming up and down the street like some kind of mechanical dinosaurs. Of course, EYE's also noticed that it's causing traffic delays and generating plenty of dirt, dust and noise in the area. Inconvenient, yes, but a small price to pay for cool new water mains in Clairemont! ♥
